Following the Guidelines for Applicants of the EMBEDED 1st Open Call, eligible sub-projects were ranked in descending order according to their overall evaluation score. The selection process first ensured the funding of at least one highest-ranked eligible proposal within each of the four predefined topics, provided that the applicable eligibility requirements and minimum scoring thresholds were met. Thereafter, the remaining available funding and in-kind products or services were allocated in descending order of score, irrespective of the topic. Where the in-kind products or services requested by a proposal had already been fully allocated to higher-ranked selected projects, proposals with a lower score requesting the same in-kind products or services were not eligible for funding due to the lack of remaining in-kind allocation.
